Unico, Inc. Adds New Photo Gallery Showing Progress of Reconstruction Work at the Mill and Processing Facility at the Deer Trail Mine and Additional Screening Plant Activity

Issued Tuesday July 3, 9:36 am ET

SAN DIEGO, CA--(MARKET WIRE)--Jul. 3, 2007--Unico, Incorporated (OTC BB: UCOI), a natural resource company in the precious metals mining sector, today announced the addition of a new photo gallery to the company's website showing recent reconstruction progress at the mill and processing facility at the Deer Trail Mine in Marysville, Utah. The photo gallery, which is located in the multimedia section of the Unico website at <http://www.unicominer.com/news/othermedia.php> also includes pictures of additional ongoing screening plant activity at the site.

The new photo gallery includes pictures of the pouring of concrete for the thickener cone and the installation of the main support that holds the thickener rakes. The company will next begin the construction of the second and final lift of steel plates for the thickener.

The Denver Mineral jig, which is used to capture any free gold from the process slurry that is not recoverable in the floatation circuit, was recently painted and there are several pictures of the jig in the gallery. The jig will be installed in line in the floatation circuit after the Krebs cyclone.

Another section of the new photo gallery contains pictures of screening plant operations at the Deer Trail Mine. The screening plant has continued screening material from the first targeted dump areas, and additional dump areas at the Deer Trail Mine are being sampled and assayed to determine the most economical fraction for screening.

There are also several pictures of the pouring of concrete for the additional retaining wall on the ramp leading into the new mill building and an exterior staircase.

"The new photo gallery shows the considerable progress that has been made toward completion of the thickener tank and additional reconstruction work at the mill and processing facility at the Deer Trail Mine," stated Mark A. Lopez, chief executive officer of Unico, Inc. "The gallery also shows the results of our ongoing screening operations, which are providing a readily available supply of feed material for the mill once processing operations are initiated at the facility."

Shareholders who would like to sign up to receive information by email directly from Unico, Inc., including when new photo galleries are posted to the company website, are asked to visit the company's website at <http://www.unicominer.com/IR/maillinglist.php> and fill in the appropriate fields.

About Unico, Inc.

Unico, Inc. (OTC BB: UCOI) is a publicly traded natural resource company in the precious metals mining sector that is focused on the exploration, development and production of gold, silver, lead, zinc, and copper concentrates at its three mine properties: the Deer Trail Mine, the Bromide Basin Mine and the Silver Bell Mine. The company has also announced agreements to acquire over 70 additional mining claims. For more information, please visit www.unicominig.com.

Forward-Looking Statements

This news release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and such Section 21E of the Securities Exchange Act of 1934, as amended. Such statements are subject to risks and uncertainties that could cause actual results to vary materially from those projected in the forward-looking statements. The company may experience significant fluctuations in operating results due to a number of economic, competitive and other factors. These factors could cause operation results to vary significantly from those in prior periods, and those projected in forward-looking statements. Information with respect to these factors, which could materially affect the company and its operations, are included on certain forms the company files with the Securities and Exchange Commission.
